

COFFEE CONSUMPTION OF GRADUATE STUDENTS TRYING TO FINISH
DISSERTATIONS

Draft of January 28, 2025 at 11 : 41

BY

ANNE ELIZABETH GARVIE

DISSERTATION

Submitted in partial fulfillment of the requirements
for the degree of Doctor of Philosophy in Food Science and Human Nutrition
in the Graduate College of the
University of Illinois Urbana-Champaign, 2024

Urbana, Illinois

Doctoral Committee:

Professor Lawrence Strongarm, Chair
Professor Joseph Green, Director of Research
Assistant Professor G. L. Foreman
Associate Professor Celia Barrera, Northern Illinois University

ABSTRACT

This is a comprehensive study of caffeine consumption by graduate students at the University of Illinois who are in the very final stages of completing their doctoral degrees. A study group of six hundred doctoral students....

To Coffee

ACKNOWLEDGMENTS

This project would not have been possible without the support of many people. Many thanks to my adviser, Lawrence T. Strongarm, who read my numerous revisions and helped make some sense of the confusion. Also thanks to my committee members, Joseph Green, G. L. Foreman, and Celia Barrera, who offered guidance and support. Thanks to the University of Illinois Graduate College for awarding me a Dissertation Completion Fellowship, providing me with the financial means to complete this project. And finally, thanks to my partner, parents, and numerous friends who endured this long process with me, always offering support and love.

CHAPTER 1

INTRODUCTION

1 Hello, here is some text without a meaning. This text should show what a printed text will
2 look like at this place. If you read this text, you will get no information. Really? Is there no
3 information? Is there a difference between this text and some nonsense like “Huardest gefburn”?
4 Kjift – not at all! A blind text like this gives you information about the selected font, how the letters
5 are written and an impression of the look. This text should contain all letters of the alphabet
6 and it should be written in of the original language. There is no need for special content, but the
7 length of words should match the language.

8 This is the second paragraph. Hello, here is some text without a meaning. This text should show
9 what a printed text will look like at this place. If you read this text, you will get no information.
10 Really? Is there no information? Is there a difference between this text and some nonsense like
11 “Huardest gefburn”? Kjift – not at all! A blind text like this gives you information about the
12 selected font, how the letters are written and an impression of the look. This text should contain
13 all letters of the alphabet and it should be written in of the original language. There is no need
14 for special content, but the length of words should match the language.

15 And after the second paragraph follows the third paragraph. Hello, here is some text without
16 a meaning. This text should show what a printed text will look like at this place. If you read this
17 text, you will get no information. Really? Is there no information? Is there a difference between
18 this text and some nonsense like “Huardest gefburn”? Kjift – not at all! A blind text like this
19 gives you information about the selected font, how the letters are written and an impression of
20 the look. This text should contain all letters of the alphabet and it should be written in of the
21 original language. There is no need for special content, but the length of words should match the
22 language.

23 After this fourth paragraph, we start a new paragraph sequence. Hello, here is some text
24 without a meaning. This text should show what a printed text will look like at this place. If you
25 read this text, you will get no information. Really? Is there no information? Is there a difference
26 between this text and some nonsense like “Huardest gefburn”? Kjift – not at all! A blind text like
27 this gives you information about the selected font, how the letters are written and an impression

of the look. This text should contain all letters of the alphabet and it should be written in of the original language. There is no need for special content, but the length of words should match the language.

And after the second paragraph follows the third paragraph. Hello, here is some text without a meaning. This text should show what a printed text will look like at this place. If you read this text, you will get no information. Really? Is there no information? Is there a difference between this text and some nonsense like “Huardest gefburn”? Kjift – not at all! A blind text like this gives you information about the selected font, how the letters are written and an impression of the look. This text should contain all letters of the alphabet and it should be written in of the original language. There is no need for special content, but the length of words should match the language.

54 After this fourth paragraph, we start a new paragraph sequence. Hello, here is some text
55 without a meaning. This text should show what a printed text will look like at this place. If you
56 read this text, you will get no information. Really? Is there no information? Is there a difference
57 between this text and some nonsense like "Huardest gefburn"? Kjift – not at all! A blind text like
58 this gives you information about the selected font, how the letters are written and an impression
59 of the look. This text should contain all letters of the alphabet and it should be written in of the
60 original language. There is no need for special content, but the length of words should match the
61 language.

62 Hello, here is some text without a meaning. This text should show what a printed text will
63 look like at this place. If you read this text, you will get no information. Really? Is there no
64 information? Is there a difference between this text and some nonsense like "Huardest gefburn"?
65 Kjift – not at all! A blind text like this gives you information about the selected font, how the letters
66 are written and an impression of the look. This text should contain all letters of the alphabet
67 and it should be written in of the original language. There is no need for special content, but the
68 length of words should match the language.

69 This is the second paragraph. Hello, here is some text without a meaning. This text should show
70 what a printed text will look like at this place. If you read this text, you will get no information.
71 Really? Is there no information? Is there a difference between this text and some nonsense like
72 "Huardest gefburn"? Kjift – not at all! A blind text like this gives you information about the
73 selected font, how the letters are written and an impression of the look. This text should contain
74 all letters of the alphabet and it should be written in of the original language. There is no need
75 for special content, but the length of words should match the language.

76 And after the second paragraph follows the third paragraph. Hello, here is some text without
77 a meaning. This text should show what a printed text will look like at this place. If you read this
78 text, you will get no information. Really? Is there no information? Is there a difference between
79 this text and some nonsense like "Huardest gefburn"? Kjift – not at all! A blind text like this
80 gives you information about the selected font, how the letters are written and an impression of
81 the look. This text should contain all letters of the alphabet and it should be written in of the
82 original language. There is no need for special content, but the length of words should match the
83 language.

84 After this fourth paragraph, we start a new paragraph sequence. Hello, here is some text
85 without a meaning. This text should show what a printed text will look like at this place. If you
86 read this text, you will get no information. Really? Is there no information? Is there a difference
87 between this text and some nonsense like "Huardest gefburn"? Kjift – not at all! A blind text like
88 this gives you information about the selected font, how the letters are written and an impression

89 of the look. This text should contain all letters of the alphabet and it should be written in of the
90 original language. There is no need for special content, but the length of words should match the
91 language.

CHAPTER 3

RESULTS

92 Hello, here is some text without a meaning. This text should show what a printed text will
93 look like at this place. If you read this text, you will get no information. Really? Is there no
94 information? Is there a difference between this text and some nonsense like “Huardest gefburn”?
95 Kjift – not at all! A blind text like this gives you information about the selected font, how the letters
96 are written and an impression of the look. This text should contain all letters of the alphabet
97 and it should be written in of the original language. There is no need for special content, but the
98 length of words should match the language.

99 This is the second paragraph. Hello, here is some text without a meaning. This text should show
100 what a printed text will look like at this place. If you read this text, you will get no information.
101 Really? Is there no information? Is there a difference between this text and some nonsense like
102 “Huardest gefburn”? Kjift – not at all! A blind text like this gives you information about the
103 selected font, how the letters are written and an impression of the look. This text should contain
104 all letters of the alphabet and it should be written in of the original language. There is no need
105 for special content, but the length of words should match the language.

106 And after the second paragraph follows the third paragraph. Hello, here is some text without
107 a meaning. This text should show what a printed text will look like at this place. If you read this
108 text, you will get no information. Really? Is there no information? Is there a difference between
109 this text and some nonsense like “Huardest gefburn”? Kjift – not at all! A blind text like this
110 gives you information about the selected font, how the letters are written and an impression of
111 the look. This text should contain all letters of the alphabet and it should be written in of the
112 original language. There is no need for special content, but the length of words should match the
113 language.

114 After this fourth paragraph, we start a new paragraph sequence. Hello, here is some text
115 without a meaning. This text should show what a printed text will look like at this place. If you
116 read this text, you will get no information. Really? Is there no information? Is there a difference
117 between this text and some nonsense like “Huardest gefburn”? Kjift – not at all! A blind text like
118 this gives you information about the selected font, how the letters are written and an impression

of the look. This text should contain all letters of the alphabet and it should be written in of the original language. There is no need for special content, but the length of words should match the language.

MY APPENDIX

186 Hello, here is some text without a meaning. This text should show what a printed text will
187 look like at this place. If you read this text, you will get no information. Really? Is there no
188 information? Is there a difference between this text and some nonsense like “Huardest gefburn”?
189 Kjift – not at all! A blind text like this gives you information about the selected font, how the letters
190 are written and an impression of the look. This text should contain all letters of the alphabet
191 and it should be written in of the original language. There is no need for special content, but the
192 length of words should match the language.

193 This is the second paragraph. Hello, here is some text without a meaning. This text should show
194 what a printed text will look like at this place. If you read this text, you will get no information.
195 Really? Is there no information? Is there a difference between this text and some nonsense like
196 “Huardest gefburn”? Kjift – not at all! A blind text like this gives you information about the
197 selected font, how the letters are written and an impression of the look. This text should contain
198 all letters of the alphabet and it should be written in of the original language. There is no need
199 for special content, but the length of words should match the language.

200 And after the second paragraph follows the third paragraph. Hello, here is some text without
201 a meaning. This text should show what a printed text will look like at this place. If you read this
202 text, you will get no information. Really? Is there no information? Is there a difference between
203 this text and some nonsense like “Huardest gefburn”? Kjift – not at all! A blind text like this
204 gives you information about the selected font, how the letters are written and an impression of
205 the look. This text should contain all letters of the alphabet and it should be written in of the
206 original language. There is no need for special content, but the length of words should match the
207 language.

208 After this fourth paragraph, we start a new paragraph sequence. Hello, here is some text
209 without a meaning. This text should show what a printed text will look like at this place. If you
210 read this text, you will get no information. Really? Is there no information? Is there a difference
211 between this text and some nonsense like “Huardest gefburn”? Kjift – not at all! A blind text like
212 this gives you information about the selected font, how the letters are written and an impression

213 of the look. This text should contain all letters of the alphabet and it should be written in of the
214 original language. There is no need for special content, but the length of words should match the
215 language.

216 Hello, here is some text without a meaning. This text should show what a printed text will
217 look like at this place. If you read this text, you will get no information. Really? Is there no
218 information? Is there a difference between this text and some nonsense like “Huardest gefburn”?
219 Kjift – not at all! A blind text like this gives you information about the selected font, how the letters
220 are written and an impression of the look. This text should contain all letters of the alphabet
221 and it should be written in of the original language. There is no need for special content, but the
222 length of words should match the language.

223 This is the second paragraph. Hello, here is some text without a meaning. This text should show
224 what a printed text will look like at this place. If you read this text, you will get no information.
225 Really? Is there no information? Is there a difference between this text and some nonsense like
226 “Huardest gefburn”? Kjift – not at all! A blind text like this gives you information about the
227 selected font, how the letters are written and an impression of the look. This text should contain
228 all letters of the alphabet and it should be written in of the original language. There is no need
229 for special content, but the length of words should match the language.
